

model
EM415PRO, AUTOMOTIVE SHORT AND OPEN FINDER

This instrument is designed to identify and trace wires or cables without damaging the insulation, you can also use it in checking for short circuit and locating open circuit and so on. In addition, it can also be used to identify some states of telephone line so that it is more convenient to install, debug, and maintain telephone lines, There are a Sender and a Receiver included in the instrument.

HOW TO USE THE PROBE: The probe of the Receiver is built of coiled steel and may be bent as needed, in order to reach wires in congested or difficult areas. Depending on the circuit characteristic and sensitivity settings, the probe will pick up the signal from the wire in a range of positions.

APPLICATION

Checking for short circuit, Locating open circuit, Wire identification, Wire tracing, etc.
