TC5000 Series

INVERTED BIOLOGICAL MICROSCOPES

The Meiji Techno TC5000 Series inverted biological microscopes have been designed to be versatile, modular, ergonomic, microscopes systems which are ideal for use in research, educational and clinical applications. Meiji's TC Series are well suited for a wide variety of routine examination of tissue cultures, precipitates, sediments, deposits, and for clinical applications such as live cell observation, in-vitro fertilization, epi-fluorescence observation, and high resolution video microscopy.

The TC5000 Series Microscopes deliver crisp, distortion-free, high resolution images in multiple modes of operation. A wide range of components, objectives and contrasting methods are available to suit your specific application. Contrast methods available include: Brightfield, Phase Contrast, or Epi-fluorescence.

GENERAL FEATURES & OPTIONS

Optical System:

All microscopes come standard with an infinity corrected optical design (F=200)

Viewing Heads:

Units are supplied with either a standard Siedentopf type binocular head inclined at 30° or a trinocular Siedentopf head inclined at 45°. Interpupillary distance is adjustable from 53mm to 75mm. A graduated diopter adjustment is provided as a standard feature on the left eye-tube of all units.

Eyepieces:

Paired SWH10X, widefield, high eye-point eyepieces, F.N 22, with a 25mm reticle mount is standard on all units. Optional SWH15X, SWH20X and SWH10X-F focusing eyepieces are available.

Nosepiece:

Quintuple, side facing nosepiece, with positive precision click stops.

Objectives:

TC Planachromat, TC Planachromat Phase or TC Planachromat fluorescence objectives are provided on respective models.

Plain Stage:

A 180mm(X) x 245mm(Y) plain stage with replaceable glass insert with 45mm opening.

Optional Attachable Mechanical Stage:

112mm (X) x 72mm (Y) movement with built in test plate holder and drop down ergonomic coaxial controls.

Optional Specimen holder Include:

1" x 3" Slide, chamber, 35mm, 55mm, 65mm Petri dish, Terasaki plate, and Hemacytometer holder.

Focus Mechanism:

Ergonomically low positioned, coaxial, coarse and fine focus knobs with adjustable tension control. Range of travel: 9mm total, 1.0mm up and 8mm down. Rotation of fine focus : 0.2mm per revolution.

Illumination:

All units come equipped with a 6V/30W halogen lamp. An aspheric condenser lens, a diffusion filter and heat absorbing filter are also incorporated into the lamphouse. A lever type iris diaphragm is provided for aperture control.

Condenser:

All microscopes come equipped with an ELWD (extra long working distance) condenser, N.A. 0.30, W.D. 73mm. Optional Condenser: N.A.0.55, W.D. 20.5mm is available for more demanding work with 40X objectives.

Photo port:

All models are equipped with a front mounted camera port suitable for CCD, 35mm, or digital cameras. Optional camera adapters are available to facilitate a wide range of camera and video equipment.

Body:

Cast aluminum alloy body for rigidity and exceptional stability.

FEATURES COMMON TO ALL MODELS

Exchangeable observation tubes. Compact wedge shaped cast aluminum alloy frame for exceptional stability and a small footprint. Chemical resistant baked enamel finish. Flexible and modular design for system expansion. Transparent stage plate for easy objective identification. Low profile coaxial coarse and fine focus controls with tension adjustment. Pre-centered 30W Halogen bulb (Brightfield & Phase models) Front mounted CCD, 35mm, digital camera port. Automatic voltage sensing power supply. Removable power cord.

Specifications

●Footprint : 364mm (D) x 220mm (W) ●Overall Dimensions : 485mm (D) x 411mm (H) x 220mm(W) ●Shipping Weight : 23 lbs/10.5kg

OBJECTIVES

Meiji Techno's new TC Plan infinity corrected objectives are designed using the latest computer aided lens design software, advanced glass formulation technology, and multilayer anti-reflection coatings.

FEATURES OF TC PLAN BRIGHTFIELD OBJECTIVES

Meiji Techno's TC Plan objectives are made with extra-low-dispersion glass and utilize new advanced multilayer anti-reflection coatings. The advanced technology used in designing and creating the TC Plan objective lenses result in an objective with a higher resolving power, higher image contrast, wider field of view, improved flatness of field, and a sharp image with a minimum of flare and ghosting. The TC Plan Achromatic objectives are color corrected for chromatic aberration in the red and blue regions of the spectrum and offer an exceptional flat field of view.

OBJECTIVES FOR BRIGHTFIELD (Infinity/1.0)

Cat.No.	Mag.	N.A.	W.D.	F.L.
MA820	4X	0.13	17.3mm	50.0mm
※ WA821	10X	0.25	7.6mm	20.0mm
※ MA822	20X	0.40	7.0mm	10.0mm
MA823	40X	0.65	2.8mm	5.0mm

The items with asterisk (※) are included in the Model TC5100 & TC5200

FEATURES OF TC PLAN PHASE OBJECTIVES

Meiji Techno's TC Plan Phase contrast objectives are made with extra-low-dispersion glass and utilize new advanced multilayer anti-reflection coatings. Five layers of a dielectric thin film are applied to the glass phase plate using a special vacuum deposition technique. The multiple anti-reflection coatings in combination with the thin film reduce the amount of stray light and glare reflected back into the system. The resulting high contrast image is described as a negative or bright contrast phase image. The use of a 546nm green interference filter helps the achromatic objectives produce their best image because they are spherically corrected for green light.

The items with asterisk (※) are included in the Model TC5300 & TC5400

FEATURES OF TC PLAN FLUORESCENT OBJECTIVES

Meiji Techno's TC Plan F, Epi-Fluorescence objectives are made using carefully selected extra-low-dispersion, non-fluorescing glass. Series layers of a new advanced multilayer anti-reflection coating are applied to minimize surface lens reflections. The TC Plan F objectives have a high light transmission which extends into the ultra-violet excitation range. The result is an objective that provides an extremely bright, high contrast image, with high UV transmission and impeccable color correction

SWH EYEPIECES

Meiji Techno's newly developed SWH Series Eyepieces are specifically designed to provide sharp, chromatic-aberration-free images with ultra flat fields of view. These specially designed, anti reflection coated, high eye-point eyepieces have been manufactured with large diameter lenses, more optical elements and a high eye-point to reduce eye fatigue and accommodate eyeglass wearers. The standard 10X SWH Series eyepiece has an eye relief of 20.7mm and a field number of 22mm. The SWH Series eyepieces are available in three different magnifications and come equipped with fold-down rubber eye-guards.
