

Introduction :

Array 364x series Power Supply is a high performance single-output programmable DC power source. It is easy to control from the front panel, or via the serial port by the computer. Up to 10 settings can be stored for later recall. The low noise, excellent regulation, and built-in voltmeter/ammeter make this reliable power supply well suited for the exact needs of design, education, test and manufacture.

Features:

- ◆ LCD display with backlight
- ◆ Number keypad and rotary knob
- ◆ Constant voltage & constant current mode
- ◆ Low output ripple & noise
- ◆ Output on/off
- ◆ Multifunction menu
- ◆ Maximum output voltage/power limitation
- ◆ High program resolution
- ◆ Over temperature/over current/over power protection
- ◆ 10 parameters storage
- ◆ Can be controlled by PC
- ◆ Can be connected in series and parallel to expand output voltage and current
